OUTSULATION® RMD - IT'S EFFICIENT, IT'S BEAUTIFUL, IT'S NOT JUST FOR NEW HOMES

West Warwick, R.I. (12 January 2009) – Dryvit Systems, Inc. manufactures exterior wall systems that provide beauty and protection for the home under the brand name Outsulation® RMD. These Outsulation systems are highly energy efficient through the placement of the insulation on the exterior of the home's wall, which independent testing by the [Oak Ridge National Laboratory](#) and the [Canadian Mortgage & Housing Corporation](#) have revealed to be the most effective insulation method. Imagine being able to place a blanket over the exterior of the home; that's what Outsulation does.

Outsulation can be used for new home projects but it can also be used when renovating a property, regardless of what is currently on the exterior (i.e. brick, vinyl, wood, etc.).

"The beauty of using an Outsulation system for your renovation project is that the aesthetic possibilities are virtually endless," stated Barbara Catlow, Director of Marketing Communications for Dryvit Systems, Inc. She continued, "Dryvit Outsulation systems can mirror the look of [brick, granite, stucco, limestone](#), even metal. The versatility of the system allows for custom quoins, trims and pilasters allowing homeowners to create a unique and visually stimulating home. No other cladding can achieve these custom looks."

-MORE-

In addition to being able to create a beautiful exterior when renovating a home, Outsulation systems also grant owners significant savings when heating and cooling their homes. The superior insulating ability of Outsulation results in the prevention of air flow and heat penetration through the walls of the structure. This means that during the winter, less heat is lost to the outside and during the summer, less heat penetrates the inside of the home. Homeowners report [savings of over 20% on their energy bills](#) after their homes have been renovated with Dryvit Outsulation RMD.

Whether the home is being renovated to improve aesthetics for the homeowner or to appeal to potential buyers, Outsulation RMD gives the highest return for your investment dollars.

About Dryvit Systems, Inc.

Dryvit is the leading manufacturer of Outsulation systems and was the company that brought exterior insulated wall system technology to North America from Europe in 1969. Dryvit systems and products have been used on over 450,000 projects worldwide. For more information about Dryvit systems or products, contact Dryvit at 1-800-556-7752, or on the Web at <http://www.DryvitHomes.com> or <http://www.DryvitIsGreen.com>.
