

Outsulation® RMD System™ (formerly Residential MD System®)

DS440

Exterior Cladding With Moisture Drainage

For An Extra Level of Moisture Protection

The Outsulation RMD System from Dryvit has been engineered specifically for residential construction. It incorporates a drainage plane that is installed between the secondary water-resistive barrier and the insulation board. It is this drainage plane that allows for incidental water to weep to the exterior. The Outsulation RMD System is mechanically fastened over a code-approved water-resistive barrier to a plywood or OSB substrate with Dryvit approved fasteners, which provide maximum wind load performance.

The Outsulation RMD System is designed to be used in all areas of the country and in all types of climates. The system, which is backed by a drainage performance warranty, offers all of the insulation benefits and architectural appeal that has made Dryvit the number one choice in North America.

A Warranty Unprecedented in the Industry

The Outsulation RMD System is backed by an unprecedented ten-year moisture drainage and materials warranty - an industry first. This unique assurance gives you an added level of confidence. The system is warranted to effectively drain any moisture that enters the wall between the insulation board and the secondary water-resistive barrier. This innovative warranty also has another important benefit: it is transferable from the builder to the owner, and subsequent owners, during the covered ten-year period.

Peace of Mind Plus All The Dryvit Features You've Enjoyed For Over 35 Years

With the Outsulation RMD System, you get two levels of weather protection plus all of these attractive features:

Energy Efficiency - The system incorporates an insulation board, which is installed on the outside of the framing, effectively sealing thermal bridges, reducing energy loss and providing a more consistent interior temperature.

Design Flexibility - Choose from a multitude of colors and textures to give the project your distinctive touch. The Outsulation RMD System allows for affordable and impressive entranceways, window borders, arches, columns, sculptured looks and more.

Durability - Dryvit systems have been tested and proven in exhaustive studies for impact, fade and stain resistance. Dryvit's DPR (Dirt Pickup Resistance) finishes and PMR™ (Proven Mildew Resistant) finishes offer owners state-of-the-art performance. Dryvit finishes, as with all other exteriors, require normal maintenance (refer to Dryvit's Homeowner's Maintenance Guide, DS235 or Cleaning and Recoating Data Sheet DS152).
